

Special Notices.

The "PAIN KILLER" may justly be styled the great medicine of the world, for there is no region of the globe into which it has not found its way, and been largely and highly prized. Moreover, there is no climate to which it has not proved to be well adapted for the cure of a considerable variety of diseases; it is a speedy and safe remedy for burns, scalds, cuts, bruises, wounds and various other injuries, as well as for dysentery, diarrhoea, and bowel complaints generally. It is admirably suited for every race of men on the face of the globe.

It is a very significant fact, that notwithstanding the long period of years that the "Pain Killer" has been before the world, it has never lost one whit of its popularity, but, on the contrary, the call for it has steadily increased from its first discovery, and at no previous time has the demand for it been so great, or the quantity so large, as it is to day.

Another significant fact is, that nowhere has the Pain Killer ever been in higher repute, or been more generally used by families and individuals, than it has been here at home, where it was first discovered and introduced. That the Pain Killer will continue to be, what we have styled it, THE GREAT MEDICINE OF THE WORLD, there cannot be a shadow of a doubt.—Providence Advertiser.

A Chapter of Facts.

Space is valuable in a newspaper, and it is therefore proposed in this advertisement to condense a variety of facts, important to the public, into a small compass. Those facts refer to Hostetter's Stomach Bitters—what that celebrated medicine is, and what it will do. In the first place, then, the article is a stimulant, tonic and alterative, consisting of a combination of an absolutely pure spirituous agent with the most valuable medicinal vegetable substances that Botanic research has placed at the disposal of the chemist and the physician. These ingredients are compounded with great care, and in such proportions as to produce a preparation which invigorates without exciting the general system, and tones, regulates and controls the stomach, the bowels, the liver, and the minor secretory organs.

What this great restorative will do must be gathered from what it has done. The case of dyspepsia, or any other form of indigestion, in which it has been persistently administered without effecting a radical cure, is yet to be heard from, and the same may be said of bilious disorders, intermittent fever, nervous affections, general debility, constipation, sick headache, mental disabilities to which the feeble are so subject. It purifies all the fluids of the body, including the blood, and the gentle stimulus which it imparts to the nervous system is not succeeded by the slightest reaction. This is a chapter of facts which refutes, for their own sakes, should mark and remember.
